

TeleMental Health Services

Kimberly provides mental health services that include telephonic counseling. There are plans to implement video counseling in the future. You can read more or ask Kimberly about this therapy by emailing overcomerscounselingllc@gmail.com or by calling 678-335-2099.

TeleMental Health is defined as follows:

“TeleMental Health means the mode of delivering services via technology-assisted media, such as but not limited to, a telephone, video, internet, a smart phone, tablet, PC desktop system or other electronic means using appropriate encryption technology for electronic health information. TeleMental Health facilitates client self-management and support for clients and includes synchronous interactions and asynchronous store and forward transfers.” (Georgia Code 135-11-.01)

TeleMental Health is a relatively new concept despite the fact that many therapists have been using technology-assisted media for years. Breaches of confidentiality over the past decade have made it evident that Personal Health Information (PHI) as it relates to technology needs an extra level of protection. Additionally, there are several other factors that need to be considered regarding the delivery of TeleMental Health services in order to provide you with the highest level of care. Therefore, Kimberly has completed specialized training in TeleMental Health. She has also implemented several policies and protective measures to assure your PHI remains confidential. These are discussed in the TeleMental Health Informed Consent located in the Patient Forms section of this web site.
